#### [4. First aid measures]

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact CHEMTREC at 1-800-424-9300 for emergency medical treatment information.

**If inhaled:** Move to fresh air free from risk of further exposure. If the exposed person is not breathing call 9-1-1, then apply rescue breathing. Seek medical attention as soon as possible.

**If on skin:** Rinse area with clean water for 15-20 minutes. Call poison control center or doctor for treatment advice. Take off contaminated clothing and wash before reuse.

**If in eyes:** Flush with clean, lukewarm water raising upper and lower eyelids at low pressure for 15-minutes. Remove contact lenses, if present, after the first five minutes and continue to rinse the eyes. Seek medical attention if no relief.

**If swallowed:** Call a poison control center or doctor immediately for treatment advice. DO NOT INDUCE VOMITING. Lower the head when person is vomiting to minimize entry into throat and lungs.

**Most important symptoms/effects, acute and delayed:** No information available.

**Note to physician:** There is no specific antidote. Appropriate supportive and symptomatic treatment as indicated by the patient's condition is recommended. Poisoning is accompanied by hyperactivity followed by sedation.

#### [5. Fire-Fighting measures]

**Suitable extinguishing media:** Use dry chemicals, carbon dioxide, or foam.

**Unsuitable extinguishing media:** No data available.

**Special hazards arising from the chemical (hazardous combustion products):** Can release vapors that form explosive mixtures at temperatures at or above the flash point. Heavy vapors can flow along surfaces to distant ignition sources and flash back. During a fire, irritating and possibly toxic gases may be generated by thermal decomposition or combustion.

**Special protective equipment and precautions for fire-fighters:** No data available.

**Advice for firefighters:** Keep out of smoke. Fight fire from upwind position. Cool closed containers exposed to fire with water spray. Dike area to prevent runoff and contamination of water sources. Equipment or materials involved in pesticide fires may become contaminated.

#### [6. Accidental release measures]

**Personal precautions, protective equipment and emergency procedures:**

**Precautions:** Wear PPE; see section 8. Keep unauthorized people away. Isolate hazard area. Avoid contact with spilled product or contaminated surfaces.

**Environmental precautions:** Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the Environment.

**Methods and materials for containment and cleaning up:**

Avoid breathing the mist. Absorb the spilled material with inert absorbent such as "kitty litter". Keep in suitable, closed containers for disposal. Clean contaminated floors and objects thoroughly with water and detergents, observing environmental regulations.

#### [7. Handling and Storage]

**Precautions for safe handling:**

Avoid contact with skin and eyes; wear PPE in section 8. Avoid breathing the mist. Use normal safety procedures and good personal hygiene. Wash thoroughly after use and before eating, drinking, chewing gum or using tobacco.

**Conditions for safe storage:**

Keep in original containers. Keep away from all ignition sources. Avoid high temperatures above 43°C (110°F.) Keep

containers tightly closed and in a cool dry area. Provide a cool well-ventilated area. Do not store near food or feedstuff. Avoid release to the environment. Avoid static charges.
